

The leading experts in stator cooling water systems

What you get

- Respected, industry-leading expertise: The Team was directly involved in 140 stator chemical cleanings with a sound record (86 offline and 54 online cleanings with no trip or damage)
- Always two dedicated and experienced experts on site with equally qualified personnel at head office providing support and backup
- There is no room for error when working on a critical component; it has to be done right the first time, every time
- Knowledgeable support for root cause analysis
- Detailed report including recommendations
- Ongoing complimentary after-service consulting

The SvoBaTech difference

- The only company with a specialized, full team of experts
 - A chemical cleaning on a critical component is a delicate process and has to be carried out by experienced engineers who understand the chemistry behind it
 - We train new team members at our home base and send them on site as a third member to watch and learn on the job
- We use only the safest and most efficient chemicals and processes
- Direct and transparent communication: You will always be in contact with the same team members
- Pride and dedication to the job through personal involvement
- Independent service provider: Our recommendations are purely technically driven
